Table of Contents

Table of Tables

1. Introduction

Department of Veterans Affairs (VA) has a need to improve the efficiencies of the outpatient medical scheduling processes through improved visibility of information. VA has created a comprehensive scheduling solution to modernize the Veterans Health Information Systems and Technology Architecture (VistA) Scheduling (VS) product.

1.1. Purpose

The purpose of this document is to provide a summary of the enhancements and defect corrections that make up VS Graphical User Interface (GUI) Release 1.7.47.1 The release software package is comprised of the following:

- VS GUI application 1.7.47.1
- VistA M patch SD*5.3*857

1.2. Audience

This document targets the administrators and users of the VistA Scheduling package.

2. This Release

Please see Features and Functionality for a summary of the enhancements and defect corrections implemented with VS GUI Release 1.7.47.1 and VistA patch SD*5.3*857.

3. Features and Functionality

The following subsections describe the features included in the VS GUI 1.7.47.1 package and VistA patch SD*5.3*857.

3.1. Enhancements Implemented and Defects Fixes

Table 1 lists the enhancements implemented and defects corrected in VS GUI Release 1.7.47.1 and VistA patch SD*5.3*857. The work item ID is the Jira issue number.

Table 1: Enhancements and Defects Fixes

Work Item ID	Summary of Change
VSE-5982	VistA: Calling SDESGETCONSULTS expects REQUEST as 1st input parameter
VSE-6046	GUI: CA containing semicolons do not display in contact attempts list view
VSE-5499	VistA: Retire RPCs 90 days post release of patch 845
